**earthwave Achieves Cisco Master Managed Services Certification**

*Company Recognized as Having Highest Level of Expertise in Developing and Delivering Managed Services*

**SYDNEY, Australia – July 21, 2011** – earthwave announced today it has achieved the Cisco® [Master Managed Services Certification](#). This certification recognizes earthwaves’ investment in the ITIL® processes, practices and tools necessary to provide high-quality [managed services](#).

“We are proud to receive this certification from Cisco. This certificate demonstrates our focus on Cisco and complements our existing Cisco based security services, which today count for more than half our business and adds to our existing DSD, PCI DSS and ISO certification.” said Carlo Minassian, Founder & CEO at earthwave.

As a Cisco Master Managed Services Certified Partner, earthwave has demonstrated the ability to deliver sophisticated solutions, met stringent requirements that reflect a depth of capabilities, and undergone an independent audit by an objective third-party auditor. earthwave was also required to offer at least two managed services using the resources and procedures necessary to deploy, manage and support Cisco solutions.

“earthwave’s investment in the Cisco Master Managed Services Certification ranks it among an elite group of channel partners with the resources to deploy, manage and support services for multiple technologies,” said Edison Peres, senior vice president of Worldwide Channels at Cisco.

earthwave offers “white label” network operation services to Cisco partners, reflecting the ability to support partner-to-partner collaboration in the deployment of Cisco based managed services.

In addition, earthwave has achieved [Cisco Powered](#) managed services designations in Cisco Powered Managed Security.

### **About earthwave**

earthwave Managed Security Services and in-cloud security services deliver real-time threat management services, helping organisations establish compliance, minimise business impact, and reduce overall security risk at acceptable cost in the face of today’s emerging threats. These services offload the burden of real-time network monitoring, advanced security analysis, and global intelligence correlation to earthwave, while allowing businesses to maintain complete insight into critical business information. All earthwave Managed Security Services and in-cloud security services leverage earthwave’s proven combination of people, process and technology to identify emerging threats and real-time attacks.

A privately owned Australian company, with operations in Sydney, Melbourne and Canberra, earthwave specialises in proactive network security management through a comprehensive and integrated set of offerings including:

- Managed Security Services
- Security-as-a-Service
- cleanpipes
- cleancloud
- Professional Security Services

Cisco, the Cisco logo, Cisco Systems and Cisco TelePresence are registered trademarks of Cisco Systems Inc. in the United States and certain other countries.
